Modernizing your traditional applications with

Containerization and Kubernetes Consulting Services
Personalized expert consultation for effective container management with Kubernetes to enable you to develop, deploy and manage your application at scale and maximize your cloud investment.
Discover hidden insights from your data

$944 million

**Worldwide container management revenue expected to reach by 2024.
- Gartner**

75%

50%

50%

75 % - Global organizations will be running containerized applications in production by 2022.

50 % respondents have adopted Kubernetes in 2021.

50 % respondents consider Amazon Web Services (AWS) to be the most popular environment for running Kubernetes clusters worldwide.

"

With the knowledge that they are running conformant open-source Kubernetes enterprises now have the freedom to develop and run cloud-native workloads anywhere including in the data center in hybrid, or public cloud, or even on edge devices.

Karthik Ramamoorthy
**VP, Cloud Security, and Architecture,
Goldman Sachs**

"

Container use means the development and deployment of applications, in general, easier more convenient, and much more predictable and reliable.

**Ellen Friedman**
**Principal Technologist,
Container Platform, HPE**

Why your business needs Kubernetes

Kubernetes has become a top choice for container orchestration for organizations worldwide. This open-source platform designed by Google offers a wide range of features that can help businesses improve their turnaround time and achieve maximum customer satisfaction.

Open Source

Ease of scaling

Resource priotization

Storage management

Self correcting

Simplified load balancing

By adding Kubernetes to your tech stack, you can:

✓ Automate deployments and upgrades

✓ Explore multi-cloud capability

✓ Achieve maximum resource optimization

✓ Engage efficient load balancing

✓ Optimize DevOps and automation

✓ Build futuristic and adaptive applications

Our services

Our experts help your team to prepare a practical roadmap to streamline your CI/CD process and manage multiple containerized applications in a complex clustered environment.

Kubernetes consultation

We help you prepare a complete action plan for streamlining Kubernetes operations and automating deployment to achieve project delivery at scale.

Infrastructure health audit

Our teams assist you in eliminating bottlenecks and optimizing your Kubernetes infrastructure to facilitate an uninterrupted and flawless development process.

Container orchestration

We help you create an automation strategy for your container lifecycle to reduce repetitive manual tasks and enable your teams to focus on building innovative solutions.

Managed Kubernetes services

Our experts collaborate with your teams to efficiently streamline and maintain your container clusters to accelerate your development and deployment processes.

SIMFORM
Great software teams. On demand.

You are in good hands

As a company with 11 years of experience in the software industry, Simform offers top-quality services to help our clients access the untapped potential of their products and services. Through our expert consulting services, we offer:

Comprehensive review and assessment

Goal-driven and business-centric solutions

100% cost-effective pricing model

**Enjoy ongoing support and maintenance`**

Risk-free trial period of 2 weeks

Recommendations on top technologies and best practices

Technology expertise

Docker

Kubernetes

Terraform

Amazon ECS

Google Kubernetes Engine

Cloud Foundry

Open Shift

Helm
